¶ Spring2.5、Struts2、Ibatis2.3开发框架...

Struts2 注解配置 demo1

▶

## Struts2 注解配置 demo2

博客分类: java

http://www.vaannila.com/struts-2/struts-2-example/struts-2-annotations-example-1.html

#### 注意:

- 1 必须引入struts2-convention-plugin-2.1.6包
- 2 WelcomeUserAction 类要放在 action命名的包下 并要用\*Action 来命名类
- 3 successPage.jsp要放在web-inf/results目录下 这个是在struts.properties 根 据struts.convention.result.path=/results来配置的

#### 一搭建环境

idk1.6 struts2.1.6 tomcat6.0

所需包

01.commons-fileupload-1.2.1

02.commons-io-1.3.2

03.commons-logging-1.1

04.freemarker-2.3.13

05.junit-3.8.1

06.ognl-2.6.11

07.spring-test-2.5.6

08.struts2-convention-plugin-2.1.6

09.struts2-core-2.1.6

10.xwork-2.1.2

## 二代码

## web.xml

#### Java代码 23

```
1.
                          <?xml version="1.0" encoding="UTF-8"?>
    2.
                          <web-app xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"</pre>
    3.
                                                             xmlns="http://java.sun.com/xml/ns/javaee" xmlns:web="http://java.sun.com/xml/ns/javaee/w
                           eb-app_2_5.xsd"
    4.
                                                             xsi:schemaLocation="http://java.sun.com/xml/ns/javaee http://java.sun.com/xml/ns/javaee/
                           web-app_2_5.xsd"
    5.
                                                             id="WebApp_ID" version="2.5">
    6.
                                                             <display-name>Struts2_Annotations2</display-name>
    7.
                                                             <welcome-file-list>
                                                                                                 <welcome-file>index.jsp</welcome-file>
    8.
    9.
                                                             </welcome-file-list>
10.
                                                             <filter>
11.
                                                                                                 <filter-name>struts2</filter-name>
12.
                                                                                                 \verb|\distance| < filter-class| > org. a pache. struts 2. dispatcher. ## WelcomeUserAction.java

```
Java代码 😭
```

```
package com.test.action;
 1.
 2.
 3.
      import org.apache.struts2.convention.annotation.Action;
 4.
      import org.apache.struts2.convention.annotation.Result;
 5.
 6.
      public class WelcomeUserAction
 7.
 8.
          private String userName;
9.
          private String message;
10.
          @Action(value = "/welcome", results = { @Result(name = "success", location = "/results/succ
11.
      essPage.jsp") })
          public String execute()
12.
13.
          {
               message = "Welcome " + userName + " !";
14.
               return "success";
15.
16.
          }
17.
18.
          public String getUserName()
19.
          {
20.
               return userName;
21.
          }
22.
23.
          public void setUserName(String userName)
24.
          {
25.
               this.userName = userName;
26.
          }
27.
28.
          public String getMessage()
29.
          {
30.
               return message;
31.
          }
32.
33.
          public void setMessage(String message)
34.
          {
35.
               this.message = message;
36.
          }
37.
38.
```

#### index.jsp在web-info下

```
Java代码 😭
```

```
<meta http-equiv="Content-Type" content="text/html; charset=UTF-8">
      <title>Annotations1</title>
 8.
9.
     </head>
10.
      <body>
11.
     <body>
12.
      <s:form action="welcome">
              <s:textfield name="userName" label="User Name" />
13.
14.
              <s:submit />
15.
      </s:form>
16.
     </body>
17.
    </html>
```

## successPage.jsp 在web-inf/results

```
w
Java代码
```

```
1.
      <%@ page language="java" contentType="text/html; charset=UTF-8"</pre>
               pageEncoding="UTF-8"%>
 2.
      <!DOCTYPE html PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN" "http://www.w3.org/TR/html4/loose</pre>
 3.
      .dtd">
 4.
      <html>
 5.
      <head>
     <meta http-equiv="Content-Type" content="text/html; charset=UTF-8">
 6.
      <title>Welcome User</title>
 8.
      </head>
9.
      <body>
10.
     <h1>${message}</h1>
11.
      </body>
12.
    </html>
```

#### struts.properties

### Java代码

struts.convention.result.path=/results

## 四运行

## http://localhost:8080/Struts2\_Annotations2/
